Get your own system of reviews about your store and products and increase your customer's trust.

**If you get an error during the installation, [please read the section 1 of our FAQ.](#)**

# CONFIGURE THE MODULE

The first thing you must do to compress the images of your store is to select the reduction percentage and the images that you want to exclude from the optimization.

## 1. Time out (this variable is not configurable), it is the waiting time of your server to execute the task

Time out  secs

*This value corresponds to the time out configured in your server, so it is not modifiable.*

## 2. JPG and JPEG reduction rate: percentage of compression of the images you want to reduce your weight.

JPG reduction

*This value corresponds to the JPG and JPEG quality. The maximum value is 100 and the minimum value is 1.*

## 3. PNG reduction value: compression value of the PNG that you want to reduce your weight.

PNG reduction

*This value corresponds to the PNG quality. The maximum value is 9 and the minimum value is 1.*

## 4. Select the images you do not want to compress: product images, category images, supplier images or temporary images.

Excluded directories ☐ Products images  
☐ Categories images  
☐ Suppliers images  
☐ Temporals images

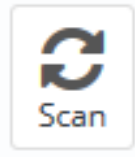

## 5. Click on the button

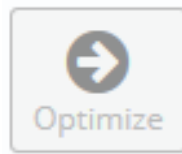

# COMPRESS THE IMAGES

**1. Set how you want to compress the images**

**2. Click on "Scan".**

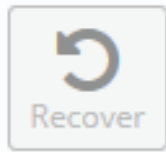

**3. Click on "Optimize".**

**4. Your images are compressed.**

# RECOVER THE ORIGINAL IMAGES OF YOUR SHOP

If you want to return to the previous weight and quality of your images, you must click on "Recover".

# FAQ – COMMON ERRORS

All the common errors about this module have been reported below and we explain to you in details how to solve them.

Please read the section that corresponds to your problem BEFORE getting in touch with us, you will probably find the answer to your problem in it.

1) I don't manage to install the module..... 19

If the problem you are having is not listed, then please get in touch with us.

## I) I don't manage to install the module

When installing the module, you may encounter this error message:

*File too large (limit of \*\*\*\*\* bytes)*

**Reason of the error:** The problem comes from the value of your 'upload\_max\_filesize' variable that is not large enough compared to the module size.

### To solve the problem, you can either :

- Go to your FTP and increase the value of your 'upload\_max\_filesize' variable in the file "/config/ config.inc.php" or in the file "php.ini"  
*ini\_set('upload\_max\_filesize', '100M');*
- Or install the module directly from your FTP, you just need to unzip the module zip file and copy/paste the folder "lgcomments" inside the folder "modules" of your FTP (the module will appear in your back-office as soon as the module folder is added into the "modules" folder).

# YOUR OPINION

Please take the time to rate our module after buying it. This is quick, constructive for other PrestaShop users and it helps us develop our activity.
